[Project Title]

[Student 1 (UNI)], *[Student 2 (UNI)]*, *[Student 3 (UNI)]*
COMS 6998: AI-Native Computing | Fall 2026
P1: Exploration & Progress | Due October 26, 2026, 11:59 PM ET

Format. Write **two pages**, excluding references. Figures and tables count toward the two pages. Use the four sections below and replace the guidance and bracketed fields with your project content.

Submission. Submit this report as a PDF.

I. Project Direction and Updates

Briefly state your project goal and the research problem it addresses. Explain why the problem is important and what makes it challenging. Summarize any updates to your scope or approach since the proposal and explain the reasons for these changes.

II. Exploration and Findings

Describe the ideas, designs, or approaches you have explored over the past three weeks. Explain what you learned, the tradeoffs you identified, and how these observations guide your current direction. You can use a design diagram, a comparison table, or findings from readings or small experiments to support your discussion.

III. Implementation and Infrastructure Progress

Summarize progress on your code, environment, and tools. Describe what is working, what is under development, and any technical challenges. Include preliminary observations or results if available. Please note that you need to submit your code with the final report on Dec 18.

IV. Next Steps

Outline your next steps. State what you aim to show at the **Nov 6 midterm presentation** and complete for **Milestone 2 on Nov 9**.
